

Cable assemblies and wiring harnesses with RF, power, communication and fiber optic connectors, custom box builds

A new MIL-SPEC technology for shielding valuable assets during transport by encasing contents with superior impact and vibration reduction; endlessly reusable and reconfigurable

Circulators, isolators and power combiners in waveguide and coax

PWBs, specializing in rigid-flex and long flex

mmw and microwave amplifiers, bias tees, detectors, diplexers, image reject mixers, multipliers, switches, antennas, attenuators, filters, magic tees, terminations, waveguide and cryogenic versions

Aluminum transit cases: Mil-Spec and commercial for 19" & 9.5" racks, Li-ion batteries, hazardous materials, clean rooms, drones, optics, EMI protection, munitions, satcom, communications, etc...
