

Cable assemblies and wiring harnesses with RF, power, communication and fiber optic connectors, custom box builds

Solid-State Power Amplifier modules and systems up to 100's of kW's

A new MIL-SPEC technology for shielding valuable assets during transport by encasing contents with superior impact and vibration reduction; endlessly reusable and reconfigurable

Rigid and flex waveguide, couplers, terminations, arc detectors, pressure windows, magic tees, power samplers, flange extrusions, and waveguide to coax adapters

Circulators, isolators and power combiners in waveguide and coax

PWBs, specializing in rigid-flex and long flex

mmw and microwave amplifiers, bias tees, detectors, diplexers, image reject mixers, multipliers, switches, antennas, attenuators, filters, magic tees, terminations, waveguide and cryogenic versions
